- HTML
- CSS
- JavaScript
- Bootstrap
- JQuery

Projects

Off To The Market

An application that allows users to search for Farmer's Markets in San Diego County and also displays the current weather based on the search results' locations.

Languages: HTML, JavaScript, CSS

Repository: <https://github.com/vossellerm/farm-market-finder>

Deployed Application: <https://vossellerm.github.io/farm-market-finder/>

Password Generator

An application that allows users to generate a random password after selecting certain criteria.

Languages: HTML, JavaScript, CSS

Repository: <https://github.com/vossellerm/password-generator>

Deployed Application: <https://vossellerm.github.io/password-generator/>

Weather Dashboard

An application that allows users to find current weather and a five-day forecast based on location.

Languages: HTML, JavaScript, CSS

Repository: <https://github.com/vossellerm/weather-dashboard>

Deployed Application: <https://vossellerm.github.io/weather-dashboard/>
